ProDiet

A Family-Owned Business

ProDiet is a family-owned business. We have been raising dogs since 1960 and making dog food for over 30 years. Our family is dedicated to improving the health and longevity of our canine friends. Most pet food companies have little or no experience with dogs—*ProDiet* foods are extensively tested, used and proven.

We try to educate the consumer by telling the facts--rather than using smart marketing just to sell product.

At *ProDiet* we will always do our best to make healthful pet foods a top priority.

*Serving the Pet Industry
Since 1960*

*Pro*Diet®

Stanley Crume began raising dogs in the early 1960s. The brochure for Minnesota Pet Breeders and Crume Kennels, below, includes photographs of some of his AKC Champion show dogs. Stanley's experience raising high-quality dogs and experimenting with different dog food formulas would prove invaluable later on when he developed *ProDiet* Dog Food.

*Pro*Diet®

We are the natural dog food pioneers.

In 1996 *ProDiet* was rated #1 for quality among leading brands of dog food from Australia, Europe, Canada and the United States in tests conducted by Daichi Haseki Co. Ltd, of Tokyo, Japan. For decades we have been testing *ProDiet* recipes and proving them to be the world's best...to keep dogs and puppies healthy, active and beautiful!

- ♦ ***ProDiet* prevents and solves problems related to nutrition.**
- ♦ ***ProDiet* aids in preventing cancer. Statistics show that about 50% of all dogs get cancer.**

We discovered a combination of ingredients that does wonders in keeping dogs healthy and preventing cancer. We have not had a dog with cancer in over 25 years.

We all know that nothing is perfect forever. But, if *ProDiet* could save half of the 50% from getting cancer, it would still be very special.

We were very fortunate to have several breeds of dogs and puppies to test many formulations of food that we made in our own plant. Without this combination--and a lot of patience, this never would have been possible.

Holistic recipes for healthy dogs and puppies

Why feed **ProDiet**?

There's a clear connection between high-quality nutrition and long-term health, and that's why dog owners who want the best food for their pets choose **ProDiet**. Whether you raise show dogs, sporting dogs or just a family pet, you won't find a more nutritious, healthful food for your dog than **ProDiet**.

All **ProDiet formulations contain sunflower oil, which is rich in vitamin E.**

- Sunflower oil improves skin health and helps to prevent infection.
- It also helps to prevent cancer and heart disease.
- In addition, it strengthens the immune system and reduces the severity of arthritis.

***ProDiet* helps prevent and eliminate...**

- Excessive shedding or a dry skin and coat.
- Hot spots and allergies.

***ProDiet* is perfect for puppies and dogs with sensitive stomachs.**

- You can switch your dog to **ProDiet** immediately, rather than gradually over time. No mixing is necessary. Just feed less for a few days and then we recommend self-feeding (free choice). Self-feeding works well for most dogs.

Performance

- All dog foods are required to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles, but that alone doesn't make a great dog food.
- Two ingredient lists may look very similar, but produce amazingly different results. You need to use the right ingredients in the proper way—and we do that.

When other foods and prescription diets fail, there is an excellent chance that **ProDiet will improve or solve a problem related to nutrition or formulation.**

Please visit our website and compare the results with all the other brands—dry, canned, frozen or homemade, and you will see why **ProDiet is America's best value food for your dog.**

Stanley Crume — Internationally Known Breeder

Dr. Al Rutledge — Professor of Animal Nutrition

*All **Pro**Diet formulations
contain sunflower oil.*

**When other foods fail, there's a 99.5% chance
*Pro*Diet will diminish the problem or solve it altogether.**

Short-term results are just the beginning when you feed *ProDiet* to your dog. The long-term results are what really count. It has been proven for decades that dogs raised on *ProDiet* stay healthy and beautiful with minimal or no cost for medical care. This is what *ProDiet* is all about.

***Pro*Diet**

www.prodietpet.com (218) 498-0235

*Pro*Diet

World's Best

Recipes

***Pro*Diet is the ultimate dog food for long-term health.**

DEVELOPED BY

Stanley Crume — Internationally Known Breeder

Dr. Al Rutledge — Professor of Animal Nutrition

Healthy Skin and Coat

- Minimal shedding
- No dandruff or dry skin

Sensitive Stomachs

- No stomach issues—ideal for bulldogs and puppies
- Switch to *ProDiet* immediately
- Feed about 25% less

Highly Digestible, with Probiotics and Flax Seeds

- Feed less and clean less — save money

Healthy and Strong Hips and Joints

- With glucosamine and chondroitin

Taste

- *ProDiet* is delicious!
- Many use it for treats, too.

Health Care Costs

- Other than the normal preventatives, the health care costs for our dogs raised on *ProDiet* have been basically zero.

A Priceless Discovery

- In over 25 years, none of our dogs have gotten cancer. That's remarkable when you consider that about 50% of all dogs get cancer. Obviously, dogs must not be exposed to farm and garden spray or chemicals.

*Pro*Diet Testimonial

Brenda Arneson, R.N., Minnesota

Thank you. Amazing change in just two days!

ProDiet-Testimonials-2023-Brenda-Arneson.pub

*Pro*Diet Testimonial

Keri Gardner, M.D., Alaska

Oct. 2, 2020. We wanted to write you with the good news that after failing several other top-quality dog foods and prescription diets, our border collie with foot allergies is doing amazing on the *ProDiet* Holistic Choice dog food. It was very easy to switch her over to the *ProDiet* because she loved the taste. We started using it as training treats to see how she would do, and whenever we called her she turned around immediately and ran back licking her lips in anticipation. She couldn't believe her good luck when she started getting full scoops of *ProDiet* for breakfast and dinner--which is surprising because she was getting rotisserie chicken and sweet potatoes twice a day! She is now on a full diet of your kibble and she is very healthy and energetic and has had absolutely no vomiting or diarrhea. The transition was very smooth and we couldn't be happier. We are lucky that we found *ProDiet*--thank you!"

ProDiet Testimonial

Pat & Ron, Minnesota

We had our two six-year-old dogs in to the vet for a check-up. I thought you might like to see the vet's reports. As you can see, they are both perfect, which the vet says is unheard of.

That just goes to show, if you want your dogs to be healthy, it pays to feed *ProDiet*, "The World's Best Dog Food."

2021 update. Our dogs have been raised on *ProDiet* since they were puppies. Had them to the vet for their annual checkup. Same results again...everything is perfect! The vet says this is unbelievable!

~~~~~

I love this dog food ProDiet!! A couple of very important things I have seen from the use of *ProDiet* for my 5 great dogs. I have used ProDiet food from day 1. I have a Siberian Husky- Sequoia who is beautiful & such a great dog. Huskies will blow their coats twice a year & shed a lot all year. However with the use of ProDiet I can say that "Sequoia" shed less than a non-shedding dog would. He will still blow his coat but the clumps, if any, are the size of a nickel or quarter at most in comparison to clumps that I have seen the size of a melon in several places on the dogs body. I have hardwood floors so I can see just how much shedding is happening. I am happy to say I take Sequoia in to get groomed maybe once a year. **The benefits from this dog food goes much farther than the amazing coats the dogs have.**

With 5 dogs you would think that my yard would be a big brown patch. But happily my yard is amazing & lush with no brown spots, even in the spring after a long winter & less waste for my 5 dogs compared to the neighbor with just 1 dog. I even did some landscaping the summer of 2012 & the brand new sod had no problems w/ the 5 dogs.

Feeding 5 dogs is also noticeably different with a good quality food. For 5 dogs I only use 40-50 lbs. of food a month. I have many friends who are convinced that the "name brand" from the vet is the way to go & use 2-3 times the food we do & that is for 1 medium size dog. Not to mention again the waist & the damage to the yards they have from using a brand of food that isn't as quality as *ProDiet*.

I dog sit for a couple of close friends & because this food is so good I don't let them bring whatever food they normally feed their dog because 1) I won't feed it to the dog when they are at my house & 2) more important & impressive is **their dog can come eat our food & have NO reaction to the change in food.** No stomach upset or loose stools or anything. Plus they like it & eat it like it is a treat to them.

I have always promoted this food & the cost to anyone I know with a dog. The one friend who doesn't use it, thinks that the size of the bag is too big for the 1 little dog she has, but will spend more on a smaller bag of less quality food & then asks me why her dog (from my litter of puppies) sheds when my dogs do not! So for me the benefit is more than this little area can express.

Thank you for such an amazing food to feed my dogs. They are like kids to me so knowing they are getting the best means so much!

*Pro*Diet Testimonials

We started using your product in January and within 2-3 weeks we started noticing the difference in our Golden Retrievers coat. She was shedding terribly and her skin was dry and flaky. Up to that point we had been using Blue Buffalo, but our retriever was shedding so bad, if you pet her you would get a clump of hair. We literally told our friends not to wear black if they were coming over. **Since the change, I cannot even begin to tell you how much improvement in her coat and skin has taken place. Since starting your food her skin has cleared up and she has stopped shedding completely.**

Unbelievable! Love your product! I tell all my friends with dogs about you. Again thanks, love your food. ProDiet for life!

We rescued our Basset mix a little over two months ago. He had trouble with loose stools at first, and we thought it was the stress of transition or maybe treats so we made sure to monitor. We kept him on the Purina Pro Plan Chicken & Rice because that's what the rescue had fed him, and the vet said it was good food. I wasn't convinced after looking at the ingredients though. His BMs improved but still aren't firm. I've tried probiotics too and fed him just chicken and rice for two days (that did work but we slipped back the other way once maintaining a normal diet.) So, long icky story short, **I'm so glad we found your food, and I'm thrilled to be supporting a local business too.**

My dad has a Brittany and said he read about your food in a hunting magazine awhile ago too. I'm bringing some back to Western ND this weekend for his dog to try as well.

Sorry to keep filling up your inbox, but I **just had to tell you how impressed I am with ProDiet after just using it a couple days!**

After you said it was ok to switch completely over, I fed Archie one cup (he gets about 2 cups a day) in the morning. His BM was better already midday. His second serving in the evening we did a half cup. By morning, he had completely normal BMs. After just two servings!!! Forget the rest of the Purina; we will donate it to the Humane Society!

Thanks so much for all your great communication. I look forward to meeting you as soon as our bag starts to get low! **I'm bringing some to my dad's dog this weekend to see if he likes it (I'm sure he will), and will definitely be singing your praises to all my pet owner friends!**

Update, Sept. 24, 2019. I just wanted to let you know we continue to love having Archie on ProDiet. My dad and brother have also switched their dogs over after seeing how well Archie did on it. They've both noticed great changes in their coats, energy and general well-being! I keep telling everyone how much we love your food! (I also wrote into chewy.com recommending your food!)

Thanks again!

I just wanted to let you know that I cannot say enough in praise of ProDiet. After five years of raising Akitas and making only a little money above expenses, **ProDiet helped me to have a more profitable year.**

My dogs used to produce few puppies, and the ones that did usually lost two or three. Finally you, who had raised dogs for years and knew what breeding kennels really needed, came along with ProDiet. Now all my dogs are having puppies and keeping them. Even two females that I had been breeding unsuccessfully for two years and was going to give up on are now pregnant.
